

HABIBA MURSALEEN

Naseerabad, Karachi

shaikhhabiba526@gmail.com | 0315-3872019 | Portfolio | LinkedIn | GitHub

Professional Summary

Full Stack Developer with proven expertise in designing and deploying scalable web applications using PHP, Laravel, ASP.NET, and SQL databases. Proficient in responsive frontend development with HTML5, CSS3, and JavaScript. Currently pursuing a Diploma in Software Engineering at Aptech Learning.

Technical Skills

Frontend: HTML5, CSS3, Bootstrap, JavaScript

Backend: PHP, Laravel, C#, .NET, APIs

Databases: MySQL, SQL Server

Tools: Git, GitHub, VS Code, XAMPP, Postman

Projects

Shale Pizza – Static Website

- Designed and enhanced responsive static website using HTML5, CSS3, Bootstrap and JavaScript.
- Implemented mobile-first design approach ensuring compatibility across all devices and browsers.
- GitHub: <https://hab712.github.io/shalepizza/index.html>

Care – Full Stack Web Application (PHP, MySQL) (Team Project - 2 Members)

- Built end-to-end web application using PHP and MySQL backend with responsive frontend interface.
- Architected and normalized relational database schema supporting complex data queries.
- Established secure authentication system with role-based session management for different user types.
- My Responsibilities:** Developed Admin Panel and Patient Panel (frontend & backend), executed User Visitor backend, built comprehensive input validation (server-side) to prevent security vulnerabilities, and optimized database performance.
- GitHub: https://github.com/HAB712/care_project

RadioCab – Full Stack Web Application (ASP.NET, SQL Server) (Team Project - 3 Members)

- Engineered full-stack application using ASP.NET framework and SQL Server database.
- Architected comprehensive database design with stored procedures and query optimization.
- Applied MVC design pattern with separation of concerns (Controllers, Models, and Views).
- My Responsibilities:** Developed Admin Panel (frontend & backend), design Database Module with query optimization, applied Email Notification System, and created Authentication & Authorization layer with rolebased access control (RBAC).
- GitHub: <https://github.com/HAB712/RadioCab-Asp.Net>

Education

- Diploma in Software Engineering – Aptech Learning North Nazimabad (Aug 2024 – Present)
- Intermediate in Engineering – Sir Syed Government Girls College (2023 – 2025)
- Matriculation in Science – Ahmed Bawany Academy (2020 – 2022)

Experience

English Teacher - Tauheed Academy Secondary School (4 Months)

- Taught English to 50+ students across 5 secondary-level classes, focusing on grammar, writing, and communication skills.
- Planned and executed lesson plans with interactive activities that improved student engagement and comprehension.
- Created assessments and provided constructive feedback to improve student writing and speaking skills.
